«Human-Centered Data Science»
Exercise 7

Lars Sipos

Human-Centered Computing, Institute of Computer Science

Freie Universität Berlin

07.06.2022

Assignment 3 - Peer-review

Assigned groups will review each other

After you checked that the other group has actively done the assignment:

» Add the other group to the *done.txt* file

https://github.com/FUB-HCC/hcds-summer-2022/tree/main/assignments/A3_Reproducibility/done.txt

» Sign with your group name, e.g.

group 1 (reviewed by group 6)

We will now decide the groups...

Assignment 3 - Peer-review

What to consider:

» Go through the tasks and discuss how you solved them

» How is the structure and documentation of the other group?

» Are you able to reproduce their results?

» Are there any open questions?

» Was there anything that particularly caught your eye?

Don't forget to update the *done.txt* file!

Reproducible Model Training Discussion

Reproducing Results Discussion

Assignment 4

Fairness Tools

https://github.com/FUB-HCC/hcds-summer-2022/wiki/07_exercise_A4

Next Time

you will have …

1. actively participated in the lecture

2. joined the after-lecture meetup

3. worked on the fourth programming assignment

Have fun!
